Who we are

Pile Vic are specialist piling contractors who focus on delivering high quality services to our clients all over Victoria. We are a diverse and growing foundation solution company based in the South Eastern suburbs of Melbourne. We offer expertise in screw piling and foundation solutions all over Victoria. Whilst we specialize in the domestic housing market we also offer piling for many other areas, such as multi-residential and commercial projects, pools, retaining walls and underpinning.

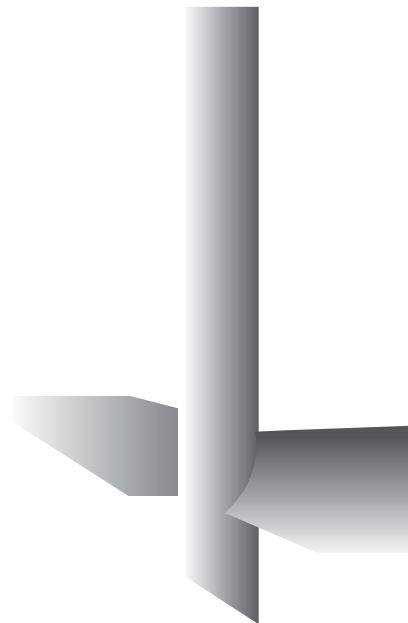

Our team at Pile Vic is equipped with considerable specialist knowledge and strive to deliver extensive and innovative

solutions to your piling jobs. With this specialist knowledge of our field we can undertake the quoting, surveying and completion of jobs which can give our clients the most cost effective and timely way to meet their deadlines. We also work strictly within the guidelines of the Australian Standards AS2870 and AS2159. We don't cut corners at Pile Vic and this ensures all our jobs are completed to the highest standards.

At Pile Vic our team is committed to producing the highest quality, cost effective and safest installation of screw piles.

Benefits of screw piles

- Faster installation
- Cost effective solutions
- Demonstrated holding force
- Better for wet and collapsing soils
- Vibration free installation
- Simple attachments to timber, concrete or steel structures
- No excess spoil to remove
- Safer sites. No exposed holes
- Suitable for various soil types

Selecting the right piling method

By harnessing our extensive knowledge of all pile products and piling methods available in the domestic and international markets, we can confidently recommend the products for your job and ensure the best practice construction and installation. We work closely with your team and are proud to secure foundation solutions that will stand the test of time.

Piling Victoria is compliant with Australian Standards AS2870 and AS2159

What we do / services

Pile Installation and Beyond

At Pile Vic we aim to provide a complete service to all our clients. Pile Vic delivers complete and integrated solutions by working with your architects, engineers, builders and concreter's. Our professionals will collaborate closely with your team to achieve high quality and cost-effective installation in your required time frame.

We offer surveying solutions for building and location set outs with the use of our total station / surveying equipment. This equipment allows our contractors to be precise with our pile locations and efficient in what we do. Our in-house staff and site supervisors are trained and highly skilled to mark out and check jobs if required. Our total stations are fully robotic and can be used in almost all environments to ensure we obtain spot on measurements.

Pile Design

Here at Pile Vic we work with some of Australia's largest engineering companies to provide everything from general assistance with pile designs through to fully independent custom designs.

Products

Blade Pile Products are our products of choice. These steel piles and accessories are Australian made and High tensile 350 and 460 grade. Blade piles are available in various sizes to cater to a broad range of design requirements, tension and compression loads. Please contact Pile Vic for further information regarding our products.

Steel Pile Accessories

Pile Vic can also supply galvanized pile, brackets and other assemblies facilitating quick and easy connection to above ground structures.

Other solutions we offer are:

- Building and location set outs
- CAD drafting and solutions
- Pile location set outs
- Quality control of building and pile locations
- As built reports and drawings

Screw Pile Applications

Our selection of steel and screw piles allows us to cater to a broad range of applications.

These include:

- Residential steel screw piles
- Multi-residential and unit developments
- Beam and joist sub floor piles
- Commercial projects
- Portable buildings and structures
